

MICAIAH (CAI) SCHEIDLER

626-739-8190 | scheidlercai@gmail.com | [linkedin.com/in/caischeidler](https://www.linkedin.com/in/caischeidler) | slipperee-code.github.io

EDUCATION

University of California, Berkeley

Bachelor of Science in Electrical Engineering and Computer Science (GPA: 4.0)

Berkeley, CA

Expected May 2029

EXPERIENCE

WEC & WEG Technical Intern

Wired Electric Company & Wired Entertainment Group

May 2026 – Present

San Dimas, CA

- Managed both companies' inventories using Rentman and taught others how to use the software
- Organized assembly of (and helped assemble) 16 industrial control panels
- Helped setup and teardown power, audio, and video for live events

11b Program Manager

Combat Robotics at Berkeley (CRB)

Apr. 2026 – Present

Berkeley, CA

- Centralizing all of CRB's educational content (30+ documents) into 10 concise slideshows
- Designed 150g fully-invertible, wedge combat robots for kids to drive at outreach events

CAEE STEM Tutor

Center for Access to Engineering Excellence

Feb. 2026 – Present

Berkeley, CA

- Provide 1-on-1 tutoring in calculus, linear algebra & differential equations, and computer science
- (For those curious: I tutor in Math 51, Math 52, Math 53, Math 54, CS61A, and CS61B)

Freelance STEM Tutor

Freelance

Sep. 2024 – Present

Monrovia, CA

- Provide weekly 1-on-1 tutoring across math and computer science with 125+ total hours of teaching
- (For those curious: I help 1 student in Python and have guided 2 students through AP Calculus AB)

Code Coach

theCoderSchool Pasadena

Jul. 2024 – Jul. 2025

Pasadena, CA

- Provided 1-on-2 tutoring in Unity/C#, Python, and Scratch with 175+ total hours of teaching
- Co-taught 20 students the basics of Python and robotics in 2 separate week-long summer programs

Content Creator & Quality Assurance Intern

Venture Valley Game by the Singleton Foundation

Jun. 2023 – Feb. 2024

Pasadena, CA

- Scripted, recorded, and edited 15 promotional videos for a real-time strategy, business-battling mobile game
- Located and communicated bugs to the dev team with media of the bug and the steps required to reproduce it

PROJECTS

The Donuts of Doom and Despair | slipperee-code.github.io/#combat-robotics

Combat Robotics at Berkeley (CRB)

Sep. 2025 – Present

Berkeley, CA

- Directed software and CAD for Donut of Doom, an award-winning, plastic 11b meltybrain combat robot
- Navigated interfacing with hardware via UART, DShot, and I²C communication protocols
- Designed, manufactured, and assembled Donut of Despair, a metal 3lb meltybrain combat robot, on a team of 3

Physical Digital Darts | devpost.com/software/digital-physical-darts-wii-darts

CalHacks 12.0

Oct. 2025

San Francisco, CA

- Won "Best Beginner Hack" out of 700 projects by leading a team of 4 to develop a compact, dart-like controller with an onboard accelerometer and an accompanying Python dartboard simulation

A Telescoping Phone Holder | devpost.com/software/a-telescoping-phone-holder

The CAD Challenge

Nov. 2025

Berkeley, CA

- Won "Best Overall CAD Project" and "Best Project in Support of Engineering" out of 70 participants by leading a team of 3 to create a customizable, modular telescoping phone holder
- Produced and edited a 3-min video advertising the project's usefulness and engineering ingenuity

TECHNICAL SKILLS

Languages: C, C#, Java, Python, Scheme, SQL

Softwares: DaVinci Resolve, Fusion 360, Onshape, Unity
